

Policy for our Environmental and Quality work

ELSOTEC (**E**lectronic **S**olutions **T**Echnology) AB is a distributor of electronic components and a provider of solutions and services for the electronic industry. Our primary customer base consists of OEM customers (Automotive, Industrial, Medical and Military) and Contract Manufacturers located in Sweden whereas our supplier base (Manufacturers and Distributors) is global.

Quality

Our goal is to always fulfil our customers (expected and unexpected) demands regarding product quality and deliveries on time.

Environmental

To protect the environment, we have different actions;

We plan both our personal transports and product deliveries to minimize unnecessary transportation and the emissions of carbon dioxide and other greenhouse gases that follows with transportation.

We make sure that the waste that arise because of our work, will be sorted out per Swedish regulations.

We follow the laws and other demands that the authorities have on us and we work with continuous improvement throughout our company.

Göteborg, February 2017

Peter Berglund, VD
ELSOTEC AB
